The concept behind the artwork is to generate the exact coordinates of the space in which it is displayed. Each location is defined by its coordinates. As a result, every artwork is site-specific and unique; the location is registered in the global system and can be pinpointed from anywhere in the world. The dimensions of the artwork are tailored to the specific wall at the location, and we produce and ship the artwork or the data accordingly.

Should the collector/owner move to a new location, we will provide the new coordinates corresponding to the new space. In this case, only the production costs apply.

Each artwork comes with a certificate of authenticity.
